

PROFESSIONAL PORTFOLIO

Maruthi Reddy 0

Senior Software Developer

Telecom Systems & Applied AI | 15+ Years Experience

📍 Stockholm, Sweden

Professional Journey

 Career Progression (2008 – Present)

2008 – 2011

Telecom Systems Engineer

 BSNL, Bangalore

Core telecom infrastructure and systems engineering foundations.

 Details

2011

2012 – 2021

IoT Accelerator

 Ericsson, Stockholm

Billing/Mediation & Microservices architecture for global IoT platform.

 Details

2022

2025 – Present

Radio Control System Engineering

 Ericsson, Stockholm

Agentic Systems & Applied AI focus.

 Details

2008

2011 – 2012

Mediation & Billing

 BSNL, Hyderabad

Specialized in billing systems and mediation protocols.

 2012

2022 – 2024

Cloud RAN Engineering

 Ericsson, Stockholm

Cloud-native enablement.

Present

Technical Skills Map

 Core Competencies & Expertise

AI & Data

Applied AI

Agentic Systems

On-device Agents

Edge AI

Embeddings

LLMs

Programming

Erlang

Python

PL/SQL

C/C++

Java

Shell/Bash

Cloud & DevOps

Kubernetes

Helm

Microservices

CI/CD

Git

Jenkins

Telecom Domain

Billing

Mediation

Cloud RAN

License Management

CDR Processing

Key Achievements & Impact

★ Major milestones and professional contributions

15+ Years

Telecom Systems

Extensive experience building robust, large-scale telecom architectures across multiple domains.

Billions

CDRs Processed

Designed systems processing billions of Call Detail Records monthly with high throughput.

Pipeline

CI/CD Leadership

Led the implementation of automated pipelines using Jenkins & Git for streamlined delivery.

Cloud Native

K8s Deployment

Migration

Legacy to Erlang

Leadership

Cross-Functional

Certifications & Education

🌟 Academic Background & Professional Credentials

Bachelor of Technology (B.Tech)
Electronics & Communications Engineering • VIT University

2008

PROFESSIONAL CERTIFICATIONS

Applied Data Science Training
Ericsson

Fundamentals of Applied AI (FAA)
Ericsson

Cloud Native Operations
Ericsson

TM Forum Certifications

TCS SAFA Certification

Blockchain Technology

CURRENT MISSION

Ericsson, Stockholm

Radio Control System Engineering

Agentic Systems & Applied AI

● Active Role

Vision & Focus Areas

Driving innovation at the intersection of Telecommunications and Artificial Intelligence through strategic technology initiatives.

Applied AI & Agentic Systems

Developing autonomous agents that optimize network functions through intelligent decision-making.

On-device & Edge AI

Pushing intelligence to the network edge for lower latency and enhanced privacy.

Policy-Driven Automation

Implementing rule-based systems that automatically adjust to network conditions.

Hybrid Cloud-Edge

Architecting seamless integration between centralized cloud resources and edge nodes.

AI-Assisted Operations

Enhancing system observability and operational efficiency using predictive AI.
